

Movement in the Solar System

The length of a planet or satellite's year is called a _____ or its _____.

Go to the following web site and watch a virtual tour of each planet and the Moon.

http://www.space.com/php/popup/virtualspacetour/noad_astropedia.php

After watching the video on each planet and the Moon, click on the Explore section and find the length of its year. For the inner planets and the Moon, you will need to calculate the length of a year in terms of Earth years. To do this, take the length of the planet's/Moon's year in Earth days and divide it by 365.24 ($n \div 365.24$).

Mercury _____

Venus _____

Earth _____

Moon _____

Mars _____

Jupiter _____

Saturn _____

Uranus _____

Neptune _____

Pluto _____
